About Us

PT Graha Teknomedika, established in 2008, has been one of the leading hospital furniture manufacturers in Indonesia. Since 2014 we have broadened our research and development to produce electro-medical devices. We have successfully implemented the ISO 9001 standard since 2009 and the ISO 13485 standard since 2014. We are certified by TÜV NORD Indonesia, assuring that our products offer safety and comfort to the standards applied by European countries.

We are committed to making continuous improvements, in order to achieve continued customer satisfaction and to exceed their expectations. The factory of PT. Graha Teknomedika, located on the outskirts of Indonesia's capitol Jakarta, lies on 26.000 m² of land. Our factory yields a high production capacity, executed by well trained engineers. Our goal is to nurture a long lasting partnership with our costumers, therefore, not only that we produce high quality products, we also provide professional after sales services.

Our Factory & Facilities

High craftsmanship and advanced technologies are key to our production process. Our factory is well equipped with the newest technology in metal processing and supported by well trained and certificated resources. We only choose material and supporting items that we are sure will match or even surpass the quality that we aim to provide. We control the quality of our products in ways to guarantee our products are delivered to you in pristine condition.

PT Jayamas Medica Industri

About Us

Founded by Dr. Jemmy Hartanto in 2002 in Sidoarjo, East Java, Indonesia. With the vision of manufacturing medical devices that are: Reliable, affordable, and with very good quality. With this he also created the "One Med" brand which is now one of the leading medical device brands in Indonesia.

The company started by manufacturing Urine Bag with only 2.200 meter square facility and 50 employees. After manufacturing Urine Bag, we venture into Antiseptic and Disinfectant products such as rubbing alcohol. In 2006, JMI started producing disposable syringe thanks to an acquisition of a local manufacturer, and until this day the disposable syringe remain to be our core product. Since then, JMI have tried to venture to new areas such as wound care.

Because of the rapid growth, now JMI employs 500 people with 8.000 meter square production facility. JMI receive ISO 13485 certification for the first time in 2013, emphasizing our commitment to quality, and receives the "No Accident" certificate annually.

JMI will always continue to look for opportunities to be better and to be more innovative for the benefit of the people.

About Us

PT. Sarandi Karya Nugraha was founded on November 12 1997, manufacturing hospital furniture. Growing from a home industry with ten employees, Sarandi KN today has 178 employees who are skilled at producing various kinds of quality hospital furniture for domestic and export markets. This significant growth is due to the Company implementing Strategic Focus – manufacturing only focuses on the production of hospital furniture and quality is the focus of every step in the manufacturing process.

In 2009 and 2010, the products made by the Company were accepted in the market, both domestic and foreign. Sarandi KN, apart from capturing a large market share in Indonesia, has exported its products to Middle Eastern countries and indirectly sold to ASEAN countries. The company sells its products to the World Health Organization (WHO), which then distributes the products to several countries in Asia and Africa.
